#### SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

#### Ingredients with workplace control parameters

Contains no substances with occupational exposure limit values.

| Engineering measures | : | Good general ventilation (typically 10 air changes per hour)<br>should be used. Ventilation rates should be matched to<br>conditions. If applicable, use process enclosures, local<br>exhaust ventilation, or other engineering controls to maintain<br>airborne levels below recommended exposure limits. If<br>exposure limits have not been established, maintain airborne<br>levels to an acceptable level. |
|----------------------|---|---|
|                      |   |   |

#### Personal protective equipment

| Respiratory protection |   | Use a properly fitted, particulate filter respirator complying<br>with an approved standard if a risk assessment indicates this<br>is necessary.<br>Respirator selection, use, and maintenance must be in<br>accordance with regulatory requirements, if applicable.<br>Protective equipment only chosen according to specific<br>regulatory requirements after a risk assessment.<br>Use respiratory protection unless adequate local exhaust<br>ventilation is provided or exposure assessment demonstrates<br>that exposures are within recommended exposure guidelines. |
