

Training requirements on the Safe Use of Diisocyanates

Dear Customer

Entry 74, Annex XVII to UK REACH places restrictions on the supply and use of products containing diisocyanates, which can be accessed on HSE website [here](#). The training requirements are set out in paragraphs 4 and 5 of [Annex XVII](#) of the restriction, as amended by 2021/904.

All industrial and professional users of products containing diisocyanates must undergo a mandatory training course. The deadline for completing this course is Thursday 24th August 2023. This training must be repeated every 5 years and training records must be retained.

Kind regards

Compliance Team
